APPENDIX 2
EXAMPLE DEVICE DATA

This Appendix provides a sample cable route, given in stickmap form. The route shown (see FIGURE A2-1) illustrates a conduit split both towards the office and towards the field from a single device location. Using the device information given on the stickmap, sample Device Data Forms have been completed (FIGURES A2-2/A2-13) to show the proper "Off1", "Off2", "Fld1", and "Fld2" location designations.

The Device Data Forms used are for a System Studies 289H LSS office. However, the example is given to point out how Field 2 and Office 2 locations are accounted for in the PressureMAP database. This information is independent of the office CPAMS type, so the same route would have the Office and Field data, regardless of the CPAMS equipment.

If, when compiling device data, you have a situation where a conduit splits, check the device information given in these examples to be sure that you are completing the Device Data Forms correctly.
